

PEHN Electrical rental boat

No drivers license!

from **€17.900 net**

incl. 0,5 kW electric engine and
8 hours / >40 km reach

For over 60 years we are building this classic electric boat. Our demand for quality combines timeless elegance with the latest technical possibilities. Our aim is to give our customers reach for a whole day boat ride and charge in the evening,

This means the boat uses due to its hull shape only 100 Watts / kilometer. Therefore the PEHN rental boat always has a slim and long shape and an very efficient and robust electric motor for rental. Our boats are equipped with modern battery technology and can be charged with solar panels as well. The PEHN 530 is a easy-to-clean and maintain electric-boat, made of high-quality materials that will give you and the next generation many years of pleasure and creates income for you.
